JINIsystems
shaping the business

We recognize that information is vital for management and presenting that information in an efficient and easily understood framework is crucial. Also, not every business manager requires similar tools; what works for a service based company might be useless for a manufacturer. That's why we offer proven ERP software which we will customize to the client's individual needs. iPack is an integrated solution that embraces the varied needs of various levels of business management and this next-generation business management software is totally integrated into one database.

ADVANTAGES

WEB ENABLED

UNLIMITED USERS

SINGLE STORAGE

MULTI COMPANY AND MULTI DIVISION

SPEED

INTEGRATED MODULES
